

**Report from
Lianne Bradley-Submitted for BUSAC meeting
Monday November 24th, 2008**

For this half term I only sat on one Committee – Ethics. Based on the results from last BUSAC meeting I am now able to contribute more to Committees as I know sit on 3 – Ethics, External Affairs and Academic Affairs. I am also apart of Senate. On Senate I sit on the Undergraduate Student Affairs Committee. Being apart of senate has helped me to understand what is currently going on with Undergraduate programming. There has been talk of eliminating 3 year degrees and switching from the current 0,2,5,8 marking scheme to raw numbers. I am working with Marc McDonald from the Brock Press to get student feedback on which marking scheme they would prefer. As well as looking for feed back from students on the importance of knowing the class average as well as your mark. Any feed back on either marking system would be helpful.

Outside of BUSAC I have volunteers for polling hours during the elections. I have also volunteered at the Sex with Sue Show during the second week of school, and volunteers for the Students running the programs for their Leadership programs. I have also helped Mark run many events through BUSU, and I thank all who have helped with volunteering or participating. This year I was given the privilege of attending the OUSA conference as a part of our delegate. I found the experience eye opening and very interesting. In the future I will be working with students from other Universities and helping them complete research for a paper on Students With Disabilities. I hope to have the opportunity to attend the Spring OUSA GA at Mac.

Currently I am working with the Kin Games Committee to help them fundraise for their Event which is coming up in March. I am Also Meeting with RECL Council almost every other week to give a helping hand where needed. I have planned to set up a meeting with the President of the Physical Education and Kinesiology club to give them a hand in the up coming year.

The past week I was able to participate in a branding seminar and have a lot of fun looking at new marketing opportunities for Brock and sharing my input.

Next semester I hope to be able to participate in more program activities with the Applied health Science Faculty, and look to get more involved with in the new committees that I have just joined.
